

### **REMARKS**

The following remarks are submitted in reply to the remarks set forth in the Written Opinion of the International Search Authority.

In Box No. V of the Written Opinion it has been indicated that claims 1, 2, 6, 11 lack novelty and claims 1 – 11 lack inventive step.

Applicants have cancelled original claims 1 – 11 and entered new claims 12 – 20 in order to address the requirements for novelty and inventive step in response to the Written Opinion of the International Searching Authority.

In the Written Opinion it has been noted that from D1 (RU 2195113) there is known a bakery product comprising at least two half-finished products, to the dough of which in order to impart a more dark colour there is additionally introduced a flour obtained from a fried and burst seed of amaranthus. This flour is a natural colorant owing to which there are provided a taste and colour of the dough.

D1 (RU 2195113) does not disclose different vegetables or fruits containing colour pigments. The use of the flour obtained from a fried and burst seed of amaranthus results in preparing a bakery having a section with a more dark colour due to the fried seed of amaranthus. This bakery product does not provide the qualities and/or advantages of the bakery product as detailed in the specification at p. 5, lines 7-19 of the application as filed and published.

References D2, D3, D4, D7, D8, D9 and D10 disclose bakery products containing particular vegetable and/or fruit in the whole volume, that is, throughout the baked product. The said bakery products have uniform colour and taste throughout the volume of the product, determined by the type of additive used. The wholesome substances content in them is limited to their content in the particular vegetable and/or fruit. References D2, D3, D4, D7, D8, D9 and D10 do not describe that in the volume of the bread product are formed sections comprising different vegetables or fruits containing colour pigments, where each section has taste and colour determined by the vegetable or fruit added to the dough and wherein the taste and colour of each section are different from the taste and colour of the adjacent sections. The known bakery products do not provide qualities as well as advantages of the bakery product according to the application, indicated on p. 5, lines 7 -19 of the application as filed and published.

D5 discloses a roll with the form of a flower. D5 does not disclose a multicolored bakery product containing vegetables or fruits.

From D6 there is known a combining of various dough preforms by means of coextrusion with the help of necessary shape die. D6 does not disclose a multicolored bakery product containing vegetables or fruits.

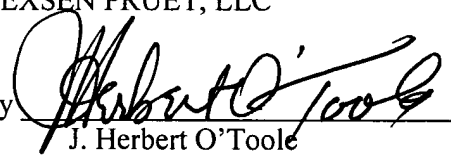

In conclusion, the documents which were noted in the International Search Report and in the Written Opinion do not disclose a multicolored bakery product in the interior of which are formed sections comprising different vegetables or fruits containing specific colour pigments. The known bakery products do not provide the healthy qualities as well as other advantages of the bakery product according to the application as indicated on p. 5, lines 7 -19 of the application as filed and published. Accordingly, the new claims 12 - 20 satisfy the requirements for novelty and inventive step.

Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Respectfully submitted,
